Education

Erasmus University Rotterdam — Rotterdam, Netherlands
MSc in Quantitative Finance — *Sep 2025 – Present*
- Thesis: "The Shape of Evidence: Fuzzy Prediction Sets for Downstream Decisions": showed how statistical evidence should be designed around the losses of the person acting on it, derived its uniquely optimal form, and identified when the standard likelihood ratio points to the wrong decision; applied to Polymarket prediction markets
- Relevant coursework: Asset Pricing, Stochastic Calculus, Advanced Machine Learning, Quantitative Risk Management

University of Amsterdam — Amsterdam, Netherlands
BSc in Econometrics & Data Science — *Sep 2022 – Jul 2025*
- Thesis: "An Honest Assessment of Realized Volatility Forecasting with Feed-Forward Neural Networks and Traditional Models": found that a parsimonious HAR-RV model outperforms neural networks out of sample across international equity markets, in normal conditions and through the COVID-19 crisis
- Relevant coursework: Econometrics, Probability & Statistics, Time Series, Reinforcement Learning, Multivariate Analysis

Peking University, Guanghua School of Management — Beijing, China
Exchange Semester — *Sep 2024 – Jan 2025*
- Relevant coursework: Financial Engineering & Risk Management, Shadow PBoC, Chinese Law and Economic Reform

Awards

Optiver Algorithmic Trading Competition — Rotterdam, Netherlands
4th Place among 50 teams — *Dec 2025*
- Engineered a market-making and arbitrage system for a live order book under millisecond latency constraints, with adaptive execution, delta-neutral hedging and real-time risk limits

Greek Mathematics Olympiad — Greece
3rd Place (2017, 2019) & Distinctions (2018, 2020), Hellenic Mathematical Society competition series — *2016 – 2020*

Research & Work Experience

The Olayan Group — Athens, Greece
Quantitative Research Intern — *Sep 2026 – Dec 2026*
- Built an extension-risk monitor for the firm's $3.8bn AT1 (CoCo) portfolio, inferring each bond's market-implied probability of being called or extended and valuing it against its peers rather than its own quote
- Modelled banks' call decisions from capital and refinancing economics with strict out-of-sample validation, and designed a CDS hedge for the exposure, with stress tests gating which signals are published

ABN AMRO — Amsterdam, Netherlands
Market Risk Trading Book Intern — *Jan 2026 – Jul 2026*
- Built and modernised about ten automated Python tools behind the desk's daily market-risk reporting (IRC, VaR, FRTB capital, XVA), replacing manual Excel processes with code running unattended in production
- Monitored trading-book risk limits by issuer and desk in Murex, identifying limit breaches and analysing Greeks, VaR and stress tests under FRTB; contributed market commentary to the weekly risk committee report

Robeco — Rotterdam, Netherlands
Part-Time Quantitative Researcher, through EUR — *Jan 2026 – Apr 2026*
- Designed a self-tuning online learning framework for fixed income volatility that adapts as markets change and corrects its own bias and calibration
- Proved formal performance guarantees and showed through standard backtests that its VaR and Expected Shortfall estimates remain well calibrated

Erasmus University Rotterdam — Rotterdam, Netherlands
Research & Teaching Assistant, "Advanced Machine Learning" — *Sep 2025 – Jun 2026*
- Tested whether market-wide volatility spillovers improve stock-level risk forecasts and the minimum-variance portfolios built on them, using rolling out-of-sample backtests
- Replicated Brownlees & Souza (2021) on Growth-at-Risk, forecasting downside risk to GDP growth across 24 countries

Valuelenz — Athens, Greece
Part-Time ML Researcher — *Jul 2025 – Sep 2025*
- Built a dynamic pricing engine for retail stores combining contextual multi-armed bandits, constraint-aware Thompson sampling, and Bayesian neural networks with multi-head attention and uncertainty quantification

Skills

Programming	Python, R, SQL (PostgreSQL), Stata, LaTeX
Platforms	Bloomberg (BQuant), Murex, Excel
Languages	Greek (native), English (fluent), Spanish (advanced), German & Dutch (intermediate), Mandarin (beginner)
Activities	Model UN (Student Officer at 5 conferences) / LAJF Camp Rising Sun 2019 (Greece representative)
